What is currently there under PMTNM.org is certainly not going to attract attention or be inviting. Larry had worked hard on what was there. The info. was accurate, and the photos were appealing and necessary. Don't know who undid the good site, but we need it back!

Attention:

What has happened to the beautiful website of picture and easy finding of categories?
Who is the current chair for the Handbook? The current display is not attracting me. I have not appointed anyone to that position?

Sharon
